

Advanced Electric Ultrasonic Tooth Cleaner with Camera

Description

Transform Your Oral Care Routine

Experience a new level of dental hygiene with our Advanced Electric Ultrasonic Tooth Cleaner. This innovative device combines ultrasonic technology with a built-in camera, allowing you to see every detail while effectively removing tartar, plaque, and calculus. Perfect for adults, it's designed for easy, at-home dental care that delivers professional results.

Key Features

- Rechargeable battery for cordless convenience
- Three operating modes to tailor your cleaning experience
- Two interchangeable nozzles for targeted cleaning
- CE certified for quality assurance
- Water tank volume of 100-199ml for extended use
- Jet pulsation frequency of 1600-1999 imp/min for powerful cleaning

Why You'll Love It

Say goodbye to costly dental visits and hello to your new oral care companion! This ultrasonic cleaner is best used daily for maintaining optimal dental health, and it's especially effective for individuals prone to plaque buildup. Its unique camera feature allows you to monitor your progress, making it easier to achieve that ultimate sparkling smile. With its rechargeable design, you can use it anywhere, whether at home or on the go.

Benefits at a Glance

- Effortlessly removes stubborn tartar and plaque

- Improves overall oral hygiene
